

Product Finder – Guide for combination and choice of Korallenzucht additives

Base products – for a natural, efficient coral reef tank				
Base water treatment	Dosage Standard	Dosage Korallenzucht	Efficient dosage combinations	Hints
ZEOvit	6-8 wks 1 L/400L	1 L/400 L		Permanent use, replacement after 6-8 weeks
ZEObak	1 drop 1-2 x per wk	1 drop/100L/week	Coral Snow	Permanent use
ZEOstart	2ml/1000 L daily	1-2ml/1000L daily		Permanent use
Activated carbon	1 L /1000 L/ 30 days	1 L/1000 L		Permanent use, replacement after 30 days
Base additions – additional nutrition and elements for a natural, efficient coral reef tank				
Xtra	1 ml/100L/daily	0,5- 1ml/100L daily		If the coral colors are brighter, we dose 1 ml, if they are darker, only 0,5 ml.
Coral Vitalizer	1 drop/100L/daily	1 drop/200L 1 -2 times per week	Coral Booster	Dosage optimal ca. 15 min. after Coral Booster, when the coral polyps are fully expanded. Optimal effects after about 7-10 days. The corals need some time, some have to learn again to chase enough food. If they are used to feeding polyp expansion will be extraordinary: chasing polyps e.g. from Acropora are wide open, even with full lights.
ZEOfood	1-2 drop 1-2 times per wk/100 L	1 drop/100L/week		Dosage starts with coral stocking in the tank
Sponge Power	1 drop/100L daily	3 x per week 1 drop/ 100L		
Iodide Complex Concentrate	1 drop/day/100 L	Each 20 days 1ml/100L mixed in mixing device with ZEOspur2	ZEOspur2	
or				
Potassium Iodide / Fluoride Concentrate	1 drop /day/100 L			

<b>Specialized products</b>				
B-Balance	1 ml / 100 L daily	3-4 ml per 100L once a week		
K-Balance	1 ml/100 L daily	1-2ml / 100L twice a week		
Xtra special	1 ml/100 L daily			We dose - when needed - 5-10 days daily. After the corals regain their normal coloration, we change back to Xtra.
BioMate	1 drop/100 L 2x/week	1 drop/100L/week	Coral Snow	
Amino Acid	1 drop/day/100 L	1-2 x/ week 1 drop/100L		
Amino Acid LPS	1 ml/day/200 L	1-2ml/100L 1-2x / week		
ZEOlife	1L/5000 L	1 ml/100L/14 days		
<b>Extreme Coloration</b>				
Coral Booster	1ml/100L/ every 2nd day	0,5ml/100L/day mixed in mixing device with FWS	FlatwormStop	
ZEOspur2	1 drop/100L each 7-10 days	0,3ml / 100L/10-14 days mixed in mixing device with Iodide Complex 3 drops / 100L	Iodide Complex	Start with 0,3 ml/100 L. If there is no effect, there are too little B-Balance elements available in the water. B-Balance should then be dosed daily for 1 wk 1ml/100L. Do not redose ZEOspur2 before expiration of 7 days.
ZEOspur Macroelem.	5ml/100L/week	5ml/100L / 14-20 days		
Stylo-Poci-Glow	2 drops /day/100 L	1 drop/100L daily – only if needed		Dosage until reaction. Dosage pause until corals keep steady coloration (min. 10 days). If this is not enough, we repeat dosage.
Iron Concentrate	1 ml/week/200 L	0,5-1 drops/100L 1-2x/week		
<b>Problem Solving</b>				
FlatwormStop	1 ml/100 L/day	0,5 ml/100L/day with CB	Coral Booster	Dosage 3 months minimum.
Coral Snow	1-4 ml/100 L / day	1 ml/100 L with B-Bal. Up to 25ml/100L w. Zeobak / BioMate. After new coral imports 10ml/100L/week.	B-Balance ZEObak BioMate	<ul style="list-style-type: none"> <li>- Mixed with B-Balance as facilitator liquid</li> <li>- Problems like slime algae, films mixed with ZEObak and/or BioMate</li> <li>- After new coral imports</li> </ul>
ZEOzym	1 spoon/wk./1000L	1 spoon/1000L/2 weeks		Solve separately in 0,5 L tank water for 6-8 h, then dosage.
CyanoClean	1 drop/100L/1-2x/wk	2 drop/100L/wk	Coral Snow	

This list serves as an orientation and eases the choice of our products. The products can each be used separately without the complete ZEOvit® system and without other Korallenzucht products. Individual solutions can be adjusted to individual tank and stock. The full, Korallenzucht typically effect with respect to quality and coloration can be achieved with the use of the system and with the use of only Korallenzucht products. Our system and our products are adjusted on each other and on a perfect coral reef tank. This is only a part of the most important additives of the complete Korallenzucht range. Please note the full product range, e.g. Reefers Best Coral Reef Salt, T5 tubes, skimmers, filters, calcium reactors and many other, important products at [www.korallenzucht.de](http://www.korallenzucht.de). Our products are the result of practical work with corals since more than 25 years. Korallenzucht.de Vertriebs GmbH, 96237 Ebersdorf b. Coburg, September 2013
